# MASTER TRADING SYSTEM

**V1.0**

## MULTI-TIMEFRAME TREND CONFIRMATION

**MN • W1 • D1 • H4**

**NO FULL CONFIRMATION = NO TRADE**

**Wait → Confirm → Execute → Manage → Exit**

**SYSTEM DOCUMENTATION • PROFESSIONAL EDITION**

01 • FOUNDATION

# System Philosophy

Master Trading System v1.0 is a multi-timeframe trend-following framework designed to participate only when the higher-timeframe trend is aligned and the lower-timeframe setup provides a confirmed pullback opportunity.

**TREND FIRST. PULLBACK SECOND. STRUCTURE THIRD. EXECUTION LAST.**

## Core Principles

• **Trend Alignment:** MN, W1 and D1 must point in the same direction.

• **Confirmation:** Supertrend, MACD and EMA 200 must agree.

• **Location:** Price must interact with Weekly Fibonacci 61.8% or 78.6%.

• **Momentum:** D1 RSI(5) identifies an extreme pullback condition.

• **Structure:** H4 ZigZag must provide a confirmed structure.

• **Discipline:** One missing required condition means no trade.

## System Character

| | |
|---|---|
| **STYLE** | Trend-following / pullback entry |
| **FREQUENCY** | Selective; no forced trading |
| **DIRECTION** | Long or Short |
| **PRIMARY TIMEFRAMES** | MN / W1 / D1 |
| **EXECUTION TIMEFRAME** | H4 |
| **CORE RULE** | NO FULL CONFIRMATION = NO TRADE |

02 • TIMEFRAME HIERARCHY

# System Architecture

Each timeframe has one job. Lower timeframes may refine an entry, but they do not override the direction established by the higher-timeframe trend engine.

| | | |
|---|---|---|
| **MN** | **MACRO TREND** | Defines the primary market direction |
| **W1** | **TREND CONFIRMATION** | Confirms the primary trend |
| **D1** | **TRADING TREND** | Confirms trend + RSI pullback condition |
| **H4** | **ENTRY STRUCTURE** | Confirms pullback structure and reversal |

**MN → W1 → D1 → H4**

**Hierarchy Rule:** H4 cannot create a BUY when the MN/W1/D1 trend engine is bearish, and cannot create a SELL when the higher-timeframe trend engine is bullish.

03 • REQUIRED COMPONENTS

# Indicator Framework

| INDICATOR | TIMEFRAME | ROLE |
|---|---|---|
| Supertrend | MN / W1 / D1 | Trend direction |
| MACD | MN / W1 / D1 | Momentum confirmation |
| EMA 200 | MN / W1 / D1 | Trend filter |
| RSI(5) | D1 | Pullback / extreme condition |
| ZigZag Depth 40 | H4 | Confirmed market structure |
| MBFX | H4 | Reversal confirmation |
| Weekly Fibonacci | Weekly | Pullback location: 61.8% / 78.6% |

**Technical note:** Before EA implementation, exact parameters and mathematical definitions for Supertrend, MACD, Weekly Fibonacci swing selection, ZigZag confirmation and MBFX reversal must be locked. This document records the strategy framework; it does not invent unspecified parameters.

04 • BUY DIRECTION

# Bullish Trend Engine

**ALL BULLISH TREND CONDITIONS MUST BE TRUE**

| FILTER | REQUIRED STATE |
|---|---|
| **MN Supertrend** | BULLISH |
| **W1 Supertrend** | BULLISH |
| **D1 Supertrend** | BULLISH |
| **MN MACD** | BULLISH |
| **W1 MACD** | BULLISH |
| **D1 MACD** | BULLISH |
| **MN Price vs EMA 200** | ABOVE |
| **W1 Price vs EMA 200** | ABOVE |
| **D1 Price vs EMA 200** | ABOVE |

If any required bullish condition is false → **NO BUY**.

05 • SELL DIRECTION

# Bearish Trend Engine

**ALL BEARISH TREND CONDITIONS MUST BE TRUE**

| FILTER | REQUIRED STATE |
|---|---|
| **MN Supertrend** | BEARISH |
| **W1 Supertrend** | BEARISH |
| **D1 Supertrend** | BEARISH |
| **MN MACD** | BEARISH |
| **W1 MACD** | BEARISH |
| **D1 MACD** | BEARISH |
| **MN Price vs EMA 200** | BELOW |
| **W1 Price vs EMA 200** | BELOW |
| **D1 Price vs EMA 200** | BELOW |

If any required bearish condition is false → **NO SELL**.

06 • LONG ENTRY

# BUY Setup

| PHASE | CONFIRMATION |
|---|---|
| **01 • TREND** | MN + W1 + D1 Supertrend bullish; MACD bullish; price above EMA 200 |
| **02 • MOMENTUM** | D1 RSI(5) ≤ 30 |
| **03 • LOCATION** | Weekly Fibonacci 61.8% or 78.6% touched |
| **04 • STRUCTURE** | H4 ZigZag Depth 40 bullish structure confirmed |
| **05 • EXECUTION** | All required conditions confirmed → OPEN BUY |

**FULL BULLISH TREND + OVERSOLD RSI + H4 STRUCTURE + FIB 61.8/78.6**

07 • SHORT ENTRY

# SELL Setup

| PHASE | CONFIRMATION |
|---|---|
| **01 • TREND** | MN + W1 + D1 Supertrend bearish; MACD bearish; price below EMA 200 |
| **02 • MOMENTUM** | D1 RSI(5) ≥ 70 |
| **03 • LOCATION** | Weekly Fibonacci 61.8% or 78.6% touched |
| **04 • STRUCTURE** | H4 ZigZag Depth 40 bearish structure confirmed |
| **05 • EXECUTION** | All required conditions confirmed → OPEN SELL |

**FULL BEARISH TREND + OVERBOUGHT RSI + H4 STRUCTURE + FIB 61.8/78.6**

08 • FINAL GATE

# Entry Decision Matrix

| CONDITION | BUY | SELL |
|---|---|---|
| MN Supertrend | BULLISH | BEARISH |
| W1 Supertrend | BULLISH | BEARISH |
| D1 Supertrend | BULLISH | BEARISH |
| MN / W1 / D1 MACD | BULLISH | BEARISH |
| MN / W1 / D1 EMA 200 | PRICE ABOVE | PRICE BELOW |
| D1 RSI(5) | ≤ 30 | ≥ 70 |
| H4 ZigZag | CONFIRMED BULLISH | CONFIRMED BEARISH |
| Weekly Fibonacci | 61.8% / 78.6% TOUCHED | 61.8% / 78.6% TOUCHED |
| **FINAL DECISION** | **OPEN BUY** | **OPEN SELL** |

**ALL REQUIRED CONDITIONS MUST BE TRUE. NO PARTIAL SCORE. NO EXCEPTIONS.**

# No-Trade Protocol

**ONE MISSING CONFIRMATION = WAIT**

| NO BUY / NO SELL IF: | ACTION |
|---|---|
| Any required Supertrend conflicts | **WAIT** |
| Any required MACD conflicts | **WAIT** |
| Price violates the required EMA 200 condition | **WAIT** |
| RSI condition is not satisfied | **WAIT** |
| Weekly Fibonacci level has not been touched | **WAIT** |
| H4 ZigZag is not confirmed | **WAIT** |
| Any condition is unclear or unavailable | **WAIT** |

## NEVER TRADE BECAUSE OF:

✕ FOMO

✕ Guessing

✕ One indicator

✕ One candle

✕ News excitement

✕ Revenge trading

✕ Recovering a loss

✕ Chasing a missed entry

# Exit & Reversal System

Primary exit logic remains intentionally simple:

**H4 ZIGZAG REVERSAL + H4 MBFX REVERSAL = CLOSE TRADE**

| POSITION | H4 ZIGZAG | H4 MBFX | ACTION |
|---|---|---|---|
| BUY | BEARISH REVERSAL | BEARISH REVERSAL | CLOSE BUY |
| **SELL** | **BULLISH REVERSAL** | **BULLISH REVERSAL** | **CLOSE SELL** |

**Confirmation rule:** One reversal signal alone is not sufficient. If ZigZag and MBFX disagree, the position remains under management until the defined exit condition is confirmed.

## Risk-control note

For automated implementation, a protective stop-loss methodology and position-sizing rules should be formally specified and tested before live deployment. They are not invented here because the original strategy did not define exact numerical parameters.

11 • EXECUTION CARD

# Quick Trade Checklist

## BUY CHECKLIST

- ■ MN Supertrend = Bullish
- ■ W1 Supertrend = Bullish
- ■ D1 Supertrend = Bullish
- ■ MN/W1/D1 MACD = Bullish
- ■ MN/W1/D1 Price > EMA 200
- ■ D1 RSI(5) ≤ 30
- ■ Weekly Fib 61.8% or 78.6% touched
- ■ H4 ZigZag bullish structure confirmed

**ALL CHECKBOXES CONFIRMED → OPEN BUY**

## SELL CHECKLIST

- ■ MN Supertrend = Bearish
- ■ W1 Supertrend = Bearish
- ■ D1 Supertrend = Bearish
- ■ MN/W1/D1 MACD = Bearish
- ■ MN/W1/D1 Price < EMA 200
- ■ D1 RSI(5) ≥ 70
- ■ Weekly Fib 61.8% or 78.6% touched
- ■ H4 ZigZag bearish structure confirmed

**ALL CHECKBOXES CONFIRMED → OPEN SELL**

# Master Decision Flow

| | | |
|---|---|---|
| **01** | **SCAN** | Search for aligned market conditions |
| **02** | **MN** | Confirm macro trend |
| **03** | **W1** | Confirm primary trend |
| **04** | **D1** | Confirm trading trend + RSI |
| **05** | **FIB** | Wait for 61.8% / 78.6% location |
| **06** | **H4** | Confirm ZigZag structure |
| **07** | **ENTRY** | Execute only after complete confirmation |
| **08** | **MANAGE** | Protect and monitor the position |
| **09** | **EXIT** | H4 ZigZag + MBFX reversal |
| **10** | **RESET** | Return to scanning |

**WAIT → CONFIRM → EXECUTE → MANAGE → EXIT**

# Trading Discipline

| | |
|---|---|
| **PATIENT** | The system is allowed to stay flat. |
| **SELECTIVE** | A missed trade is preferable to an unconfirmed trade. |
| **CONSISTENT** | Do not change rules because of one winning or losing trade. |
| **OBJECTIVE** | Use defined conditions, not intuition. |
| **AUDITABLE** | Every trade should be explainable from the checklist. |

**DON'T TRADE ALL THE TIME. TRADE ONLY THE CONFIRMED SETUPS.**

14 • GOVERNANCE

# Version Control & Deployment Notes

**Current Version:** MASTER TRADING SYSTEM v1.0

This document defines the strategy framework and operating rules. Before automated deployment, all unspecified technical parameters must be formally locked, documented and tested. Parameter changes should create a new version so that test results remain traceable.

## Recommended development sequence

- Technical parameter specification
- Mathematical rule definition
- Historical backtest
- Out-of-sample / forward testing
- Execution-cost and slippage testing
- EA implementation
- Demo validation
- Only then consider live deployment

**TRADE LESS. TRADE WITH CONFIRMATION.**

## IMPORTANT RISK NOTICE

Trading financial markets involves substantial risk. Historical or backtested performance does not guarantee future results. This document is a rules framework, not a promise of profitability or a recommendation to trade a particular instrument. Risk, leverage, execution quality, spread, slippage and market conditions can materially affect outcomes.
