==========
AI MONSTER EA - INPUT GUIDE
==========

🔑 LICENSE & CANDLE SETTINGS

A - Key:

Enter your activation key here. Without a valid key, the EA will not function.

1- TradeDirection

Choose which direction the EA trades:
- tdBoth: Buy and Sell
- tdBuy: Buy only
- tdSell: Sell only

2- IgnoreOppo (true/false):

If true, the EA will ignore opposite signals while a trade is active.
Example: If a Buy trade is open, Sell signals will be ignored.

📦 ORDER SETTINGS

3- Takeprofit (Default: 0):

Take Profit in pips. If set to 0, no TP is set based on pips.

- TP Amount (Default: 0):
Take Profit in dollars. If set, the trade will close when this amount of profit is reached.
Priority: If both tpAmount and takeprofit are set, the EA uses the one that's reached first.

4- SL Multiplier (Default: 2):

Stop Loss multiplier based on Candle A's range A=Candle before entry.
Example: If Candle A's range is 10 pips and slMul is 2, SL will be 20 pips.

- lotSize (Default: 0.01):
Fixed lot size for all trades.

5- CancelAfterCandles (Default: 5):

If entry conditions are not met within these many candles, pending orders are cancelled.

- enableTrailingSL (true/false):
If true, the EA will use a trailing stop loss that follows price once in profit.

💰 EQUITY CLOSE SETTINGS

6- EquityCloseMethod:

Options:
- EQUITY_CLOSE_DISABLED: Do not use equity-based closing.
- EQUITY_CLOSE_BY_PERCENT: Close all trades when total equity profit/loss hits a set percentage.
- EQUITY_CLOSE_BY_AMOUNT: Close all trades when total equity profit/loss hits a dollar amount.

- equityProfitTarget:
Profit target in % or $ (based on method above).
Example: Set 100 for 100% equity growth, or $100 if using dollar method.

- equityLossTarget:
Max equity loss in % or $ before all trades are closed.

7- EnableEARestart (true/false):

If true, EA will automatically restart trading after equity close is triggered.
If false, EA will stop trading until next manual start or new day.

⏰ TRADING TIME SETTINGS

8- tradingStartTime (Default: "00:00"):

Time when EA starts looking for trades each day (format: HH:MM).

- tradingStopTime (Default: "23:59"):
Time when EA stops opening new trades.
EA will not open new positions outside of this time window. Existing trades may still close after the window.

⚙️ OTHER SETTINGS

- _magic (Default: 9244):
Unique ID to identify trades by this EA. Keep it different from other EAs if running multiple on same account.

- enableDebug (true/false):
If true, the EA will print extra information in the Experts or Journal tab. Helpful for troubleshooting.
