Dear Customer,

1- Please note that after installing the ROBOT EA (Expert Advisor), it will not start trading immediately. The EA follows a specific strategy and requires time to analyze the market conditions before making any trades. It's important to be patient and allow the EA to work within its designed parameters.

We recommend not rushing or constantly watching the screen. The EA is optimized to take trades when the right conditions are met, which might take some time. Trust the strategy and give it the necessary time to perform its analysis.

2 - Click on "Tools" at the top, then select "Options," and go to the "Expert Advisors" tab. Follow the instructions in the image below.

-Allow algorithmic trading
-Allow DLL imports
-Allow WebRequest for listed URL
