Important to Double Check!

TPC Bot: Important Checkpoints After Installation!

Below is an overview of essential steps and checks to review after installing the TPC Bot. Follow these instructions carefully to avoid issues.

1. **Download** the files and watch the ***Installation Video*** for further instructions.
2. Follow the steps in the video closely. Carefully set the ***lotsize*** and ***equity stop amount*** based on your account size. Always maintain the same ratio between the two; the ***Equity Stop Amount*** must never exceed your account size to minimize risks. A standard ratio is 220 Equity Stop per 0.01 ***lotsize*** (so 440 for 0.02, 880 for 0.04, etc.).
3. ***ALWAYS ENSURE YOU HAVE LOADED AND SAVED THE SETFILE VIA "OK" BEFORE TURNING ON ANY ALGO TRADING!*** This is the ***strategy***. ***WITHOUT*** the ***strategy***, the bot will not work and ***will mess up!***

   → *You can immediately recognize a faulty Setfile installation: the bot opens a buy and sell simultaneously. In that case, immediately turn off* ***Algo Trading****, close all trades, and repeat the steps for a correct Setfile installation.*
4. Never close **MetaTrader 5** on your **VPS** directly using the close button in the top right corner, as this will stop the program from running, and thus the TPC Bot will not be able to operate either. Use the blue bar at the top center of your screen on **Windows** to close or minimize the VPS using the minus or close button in that bar, or close/minimize the **Remote Desktop** on a **MacBook**.
5. The ***bot*** trades when it receives confirmations (averaging 2-5 times per week, not daily). Therefore, check only once a day (for example, in the evening) via your phone in ***MetaTrader 5*** to see if there have been any trades.
6. Keep your ***manual trades*** separate from the ***automated trades*** of the ***bot***.
7. Enjoy ***emotionless*** and fully ***automated trading***!

IMPORTANT: Double-check point 3 to ensure everything is set correctly and no issues arise. If you encounter any problems or cannot get it to work, contact us and we will assist you!
